## **DIVISIONAL OPERATING PROCEDURE**

### **POLICY STATEMENT**

The Chief Constable has determined that a geographically based policing system is to be adopted for Tayside Police. In order to drive operational activity the National Intelligence Model (NIM) will be fully adopted and consistently implemented through Tasking and Co-ordination Group (TCG) meetings. A problem solving approach aligned with and administered through TCG meetings will be developed at all levels but especially, among those officers who directly interface with members of the public.
